The European Union Ecolabel program reports this substance is anaerobically degradable.	low	EU Ecolabel: Detergents Ingredients Database
benign, health	low	Environmental Working Group. 2012. Established innocuous properties.
benign, environment	low	Environmental Working Group. 2012. Established innocuous properties.

# Understanding scores

EWG provides information on cleaning product ingredients from the published scientific literature, to supplement incomplete data available from companies and the government. The ratings indicate the relative level of concern posed by exposure to the ingredients in this product - not the product itself - compared to other product formulations. The ratings reflect potential health hazards but do not account for the level of exposure or individual susceptibility, factors which determine actual health risks, if any.

## HOW WE DETERMINE SCORES

### Hazard score

The Healthy Cleaning ingredient hazard score, from A to F, reflects known and suspected hazards linked to the ingredients. The EWG VERIFIED® mark means a product meets EWG's strictest criteria for transparency and health.

#### WEIGHT-OF-EVIDENCE APPROACH

A product's hazard score is not an average of the ingredients' hazard scores. It is calculated using a weight-of-evidence approach that factors in all of the hazards or health impacts associated with the ingredients.
